SCISSORS

Serrated edge bandage scissors to cut ribbon

Important Product Notes

For complete installation instructions or support information visit www.Sanipull.com or call 1-800-SANIPUL

¹SuperSanipull spring clips are designed to release from an over bed light pull chain at 12 +/- 1 lbs (5 +/- 0.5 kg) overforce pull. Simply re-attach for ongoing switch protection. If the user-end of the ribbon is looped around bed rail with the clip snapped onto the ribbon, the clip will release if the safety rail is lowered or the bed is moved.

²Sanipull anti-ligature ribbon (symbol, PER) option helps mitigate the risk of entanglement or strangulation with a proprietary safety breakaway designed to tear apart at 29 +/- 2 lbs (13 +/- 1 kg) force at 74°F (22 °C). This ribbon is factory modified with 5/16" diameter holes punched every 6 inches along its length. Because of the nature of this ribbon modification, warranty extends only to the attachment hardware. Note: Wilshire Works or its distributors will not be held liable for death or damages directly or indirectly involving any Sanipull product.

Standard Sanipull ribbon colours: blue (B) and green (G) for over bed light pulls and red (R), for nurse call pulls.

Sanipull is a durable solution that can be repaired by replacing damaged components. Wilshire Works offers a 5-year replacement guarantee on SuperSanipull components if correctly installed.

Wilshire Works continually works to improve our products and therefore reserve the right to make design or material changes.
